Who We Are

The Professional Candle Making Equipment Leader

Wax Melters melting tanks and pouring equipment have been a life saver to our long list of candle making customers, large and small, including many of America's leading Candle Companies. It has been our legendary, innovative systems which are designed just for candle makers that have made us the industry leader. All of our equipment and systems are designed just for your needs which means they increase your candle production and saving you time while being durable, easy to use, reducing waste and creating efficiency and a safe environment.

Superior Candle Making Equipment:

Our equipment has been featured in books like *The CandleMaker's Companion*. Candle makers world-wide rave that our products produce the beauty of hand poured candles with the speed, precision and efficiency of manufacturing. Our melting tanks melt wax faster than any other melter. Our candle making systems are simply the most innovative candle pouring-filling systems on the market.

Battle Tested:

Waxmelters supplies candle makers world-wide, including many of America's leading candle making companies with their equipment. Our melting tanks and pouring equipment are used almost every day by candle makers around the world with the most demanding production schedules. When you buy our products, you can be confident that your new equipment will be of the finest quality, reliable and ready to fulfill your candle production needs.

Candle Makers World Wide Choose Wax Melters:

Wax Melters sells candle wax melting tanks and candle wax pouring equipment and systems to candle makers on 6 continents: North America, Asia, Europe, Australia, South America and Africa. WaxMelters provides candle making equipment to some of the largest candle making businesses in the world and has customers in countries around the world, including candle makers in India, Japan, Korea, New Zealand, Jamaica, Australia, Brazil, Indonesia, England, Wales, Germany, France, Spain, Latvia and Canada.

Agitators & Mixers

Professional CandleWax Mixers

Mix & Blend Wax, Fragrance & Scents FAST!

Agitators are ideal for blending & mixing candle wax, fragrances & colors in our complete line of PW melting tanks or your own wax melting tank.

Our Mixers are designed to keep your wax hot by forcing a continuous transfer of heat while gently stirring and creating the perfect consistency.

We offer a full line of agitators (top lid and sidewall mounted) which work great for making all types of candles.

Dipping Tanks: Cost Efficient, Safe and a Production In creaser!

Built to last, our Dipping Tanks are generally divided into

Hand Dipping Tanks or Dip & Carve Tanks:

All dipping tanks are double walled and utilize the double boiler principal for even, cost efficient wax heating and safety.

Each dipping tank is fully insulated to minimize heat loss, maximize efficient operation and potentially reduce burns.

All dipping tanks have stainless steel interior and modern cool to the touch wood grain exterior.

Easily removable wax chambers for quick color changing.

Easily adjustable temperature from 50-250° F/10-121° C , as well as convenient way to add water.
